Dear Hiring Manager,

I am excited to apply for the Frontend Developer role at your organization. With over two years of experience in developing high-performance React applications, I specialize in building scalable, efficient, and user-centric web solutions.

At Manaknight Digital Inc., I optimized React.js applications, reducing API calls by 40% and enhancing system performance. I also engineered AI-driven features, including voice-to-text and chat tools, improving user engagement. Previously, at MedLink Healthcare, I transformed Figma designs into fully responsive React-MUI applications and integrated GraphQL APIs, reducing load times by 30%.

My expertise includes React.js, Next.js, ES6, GraphQL, and UI/UX best practices. I am adept at writing clean, maintainable code, reviewing pull requests, and ensuring high-quality UI/UX implementation. I am also proficient in Git and front-end testing methodologies.

I am eager to bring my technical skills and problem-solving mindset to your team. I look forward to discussing how I can contribute to your projects.

Best regards,
Naimur Rahman
